

**Mathematical Treasure Hunt**

Maths is all around us, for this challenge you need to take a photo of your own for each mathematical property in and around your home.

When you have your 15 photos make either a collage or a power point.

I've put an example of each below!

<p>A line of symmetry</p> 	<p>Rotational Symmetry</p> 	<p>A special number</p> 
<p>A mathematical pattern</p> 	<p>Tessellating shapes</p> 	<p>A mathematical 3D shape</p> 
<p>Mirror Images</p> 	<p>Parallel lines</p> 	<p>An obtuse angle</p> 
<p>A 3D shape with a plane of symmetry</p> 	<p>Perpendicular lines</p> 	<p>An acute angle</p> 
<p>A common 2D Mathematical shape (this one's a Trapezium)</p> 	<p>A triangle</p> 	<p>A spiral</p>
