

Geography AS Transition Work

Task 1: Dynamic Landscapes: Coastal Landscape and Change. Complete the table for the contrasting coastlines

	Holderness Coast, East Yorkshire	Dorset Coast
Where is it located? Key facts and figures		
What coastal processes take place along this coastline? (e.g. types of erosion, transportation and deposition)		
What coastal landforms are found at this coastline and how are they formed? (e.g. caves, arches, spits)		
How is this coastline affected by climate change? (e.g. sea level rises)		
What management takes place at this coastline? Does this cause conflict? Are some places along the coastline managed more than other areas? Why is this?
